

SMART[®] Health Card QR Codes and SMART[®] Health Links

Docket[®] offers a variety of options to securely authorize access to your verifiable immunization records, including machine-readable QR codes and sharing links.

SMART[®] Health Cards

SMART[®] Health Links (comprehensive immunization records)

SMART[®] Health Cards

Share a machine-readable copy of your COVID-19 vaccination records using SMART[®] Health Cards. Docket[®] SMART[®] Health Cards integrate with Apple Wallet. Optionally, Google Pay integration is also available. COVID-19 data is encoded directly in the image of each QR code.

SMART[®] Health Links

Docket[®] SMART Health Links enable you to authorize access to your *full* immunization record using passcode-protected sharing links with configurable expiration dates and audit logging. SMART[®] Health Links automatically update alongside your Docket[®] account, so don't have to share new URLs with each new vaccine.

Note: Docket[®] SMART[®] Health Cards and Links are available in select jurisdictions. Each QR code and sharing link is vended by Docket[®] and electronically signed by the corresponding health department. For more information, visit smarthealthit.org.
